

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Currently Amended) A plasma display panel comprising:

a first dielectric layer having a substantially rectangular shape for covering a display electrode ~~which is~~ and a front substrate, the display electrode being formed on ~~[[a]]~~ the front substrate and ~~which includes~~ including a scan electrode and a sustain electrode; ~~[[and]]~~

a second dielectric layer having a substantially rectangular shape for covering a data electrode and a back substrate, the data electrode being formed on ~~[[a]]~~ the back substrate; and
a barrier disposed on the second dielectric layer, wherein

at least one of the first dielectric layer and the second dielectric layer in plane view has four corners with a radius of curvature of other than zero, and each of the four corners is where two sides of the substantially rectangular shape meet.

2. (Previously Presented) The plasma display panel according to claim 1, wherein at least one of the first dielectric layer and the second dielectric layer is formed by firing a precursor material layer transferred from a transfer film, the precursor material layer has a substantially rectangular shape, and four corners of the substantially rectangular shaped precursor material layer are rounded.

3. (Previously Presented) The plasma display panel according to claim 1, wherein at least one of the first dielectric layer and the second dielectric layer is formed by firing a

Application No.: 10/507,312

precursor material layer having photosensitivity, the precursor material layer has a substantially rectangular shape, and four corners of the substantially rectangular shaped precursor material layer are rounded.

4-10. (Cancelled)
